## COMPANY

Organizations all over the world find themselves in a context of a growing complexity of their data and the need to use it. They need software to develop their business, solve new problems, and take better decisions. They require the support of a team that they can trust, one that applies industry best practices together with scientific method and knowledge that understands their needs, and that is able to exceed their expectations.

Machinalis is here to Provide this Support.

We are a team permanently learning, eager to research and build solutions for complex problems. A team that shares with our customers the demand for excellence and adding high value. A team that proudly knows the positive impact that it will have in the development of science and industry. We are convinced that we can achieve this based on the values that make us good neighbors of our environment, our clients, our people, and the community.

## OUR TEAM

Awesome technology enthusiasts with deep involvement in the Open Source Community, leading sectors of industry and academic fields.

A team of well recognized engineers, scientists and managers of the South-American Community.

A Sustainable Innovation lab working to expand the boundaries of Science and Industry.

A Board focused on transforming Machinalis into the leading team of engineers, developers, scientists and managers in America.

## WHAT WE DO

**Custom Software Engineering Research and Development**

**Services:**

- NLP, Machine Learning, Data Mining, Artificial Intelligence
- Data Extraction, Data Processing, Data Analysis, Data Visualization
- Complex Web and Desktop Development
- We \*love\* Python

## SERVICES

- Proofs of concept and functional prototypes development
- Custom Quality Software Development of an entire project
- Business Tools Improvement

## AREAS OF EXPERTISE

- Machine Learning / NLP / Data Mining / Artificial Intelligence
- Data Extraction / Data Analysis / Data Processing Data Visualization.
- Complex Web/Desktop Development / Process Automation / Python-Django Development.

The Python Software Foundation (PSF)  
is the organization behind Python.

**Become a member of the PSF and help  
advance the software and our mission.**

### About the PSF

The Python Software Foundation is a non-profit organization devoted to advancing Open Source technology related to the Python programming language.

The PSF holds the intellectual property rights to Python and plans to fund portions of future development of the language. Additional information on the PSF is available at <http://www.python.org/psf>.

To make a tax-deductible donation, please visit  
<http://www.python.org/psf/donations>

Corporate sponsorships are also being accepted.

*The mission of the Python Software Foundation is to promote, protect, and advance the Python programming language, and to support and facilitate the growth of a diverse and international community of Python programmers.*

—from the [Mission Statement page](#)

The Python Software Foundation (PSF) is a 501(c)(3) non-profit corporation that holds the intellectual property rights behind the Python programming language. We manage the open source licensing for Python version 2.1 and later and own and protect the trademarks associated with Python. We also run the North American **PyCon** conference annually, support other Python conferences around the world, and fund Python related development with our **grants program** and by funding special projects.

Software Engineering Research and Development Services

- Proofs of concept and functional prototypes development
- Custom Quality Software Development of an entire project
- Business Tools Improvement

#### Areas of expertise

##### + Machine Learning / NLP / Data Mining / Artificial Intelligence

Turning the thinking, learning and understanding capabilities of machines into a tool that can be used to the benefit of you, your users and other machines.

##### + Data Extraction / Data Analysis / Data Processing / Data Visualization

Transforming big volumes of unintelligible and disperse data into visible information:

##### + Complex Web/Desktop Development / Process Automation / Python-Django Development

Managing and showing everything you, your users and the machines need.

#### Our Team

Awesome technology enthusiasts with deep involvement in the Open Source Community, leading sectors of industry and academic fields.

A team of well recognized engineers, scientists and managers of the South-American Community.

A Sustainable Innovation lab working to expand the boundaries of Science and Industry.

A Board focused on transforming Machinalis into the leading team of engineers, developers, scientists and managers in America.
